

Melissa &amp; Doug®

# CLASSIC TOY

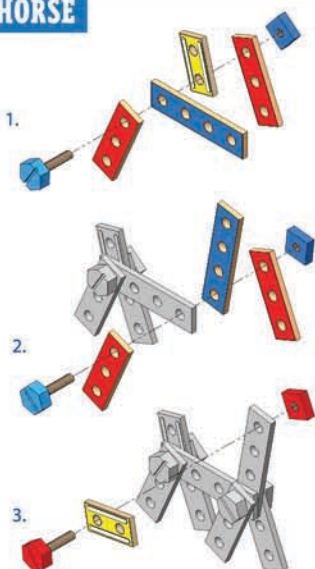

## HAMMER & SAW TOOL BENCH

helps teach sorting, matching, and counting skills;  
encourages fine motor skills, hand-eye coordination, and imaginative play.

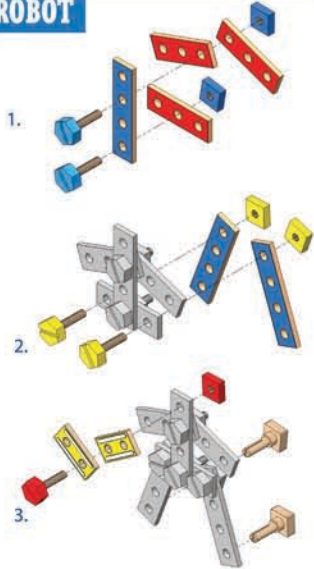

### BUILD IT

Use these blueprints to make four cool projects . . . or come up with your own creations!

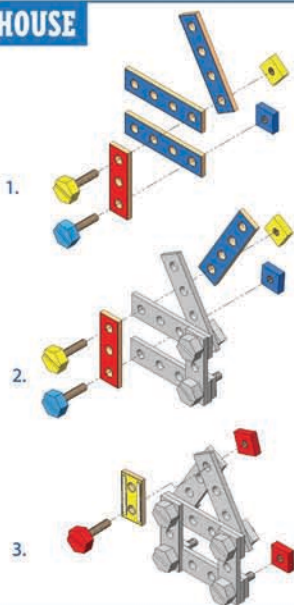

#### HORSE

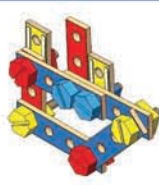

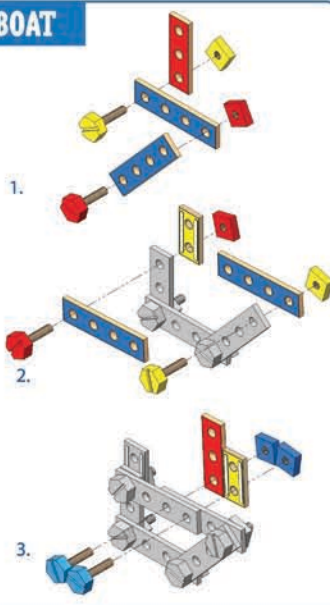

#### ROBOT

#### HOUSE

#### BOAT

### Helpful Hints:

- To use the C-clamp: Place a stack of pieces between the top and bottom arms of the clamp, then tighten the bolt to press them together. (To attach pieces to the tool bench, simply include one of the box surfaces as part of your stack!)
- For sawing: Use the C-clamp to attach the thick part of the sawing block to the tabletop. Attach the thin pieces so they are resting on the table or extending off of it. (For best results, only the piece that will be cut off should extend off the table.)
- Due to the natural variation in wood, the wooden nails may initially be tight in the nail holes. With repeated use, the holes will expand slightly for easier removal. To improve initial function for the child, rub a bar of soap along the sides of the nails to make removal easier.
